* Indicates absolute change in percentage points.
** Due to delayed reporting, this figure may underestimate total diagnostic tests and week-on-week changes in diagnostic tests.
† 95% of facilities reported during the most current week.

DATA SOURCES

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Cases and Deaths: State values are aggregated data provided by the states to the CDC. Historical reports of cases and deaths exceeding 1% of the total new cases or deaths reported in the US that day have been excluded. Data is through 6/10/2021; previous week is from 5/28 to 6/3.

Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Test positivity through 6/8/2021; previous week is from 5/26 to 6/1. Test volume through 6/4/2021; previous week is from 5/22 to 5/28.

SNFs: Skilled nursing facilities. National Healthcare Safety Network. Data is through 6/6/2021, previous week is from 5/24 to 5/30.

Admissions: Unified Hospitals Dataset in HHS Protect. Data is through 6/9, previous week is from 5/27 to 6/2.

Shortages: Unified Hospitals Dataset in HHS Protect. Values presented show the latest reports from hospitals in the week ending 6/9/2021 for staffing and the week ending 6/9/2021 for supplies.

**METHODS:** Details available on last two pages of report.

All Red Counties: Etowah, Marion, Winston, Lawrence, Chambers, DeKalb, Fayette
All Red CBSAs: Gadsden, Fort Payne

DATA SOURCES
Maps and figures reflect 7-day average of data from 6/4-6/10 (cases), 6/2-6/8 (tests). Metro areas and counties are listed in order of the total number of cases in the last week from largest to smallest.
Note: Most recent days may have incomplete reporting.
Cases: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. Data is through 6/10/2021.
Testing: CELR (COVID-19 Electronic Lab Reporting) state health department-reported data. Data is through 6/8/2021.
Combined Transmission Level: If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See CDC COVID Data Tracker.
**METHODS:** Details available on last two pages of report.

DAILY NATIONAL COUNT OF VACCINE DOSES ADMINISTERED BY DATE OF ADMINISTRATION
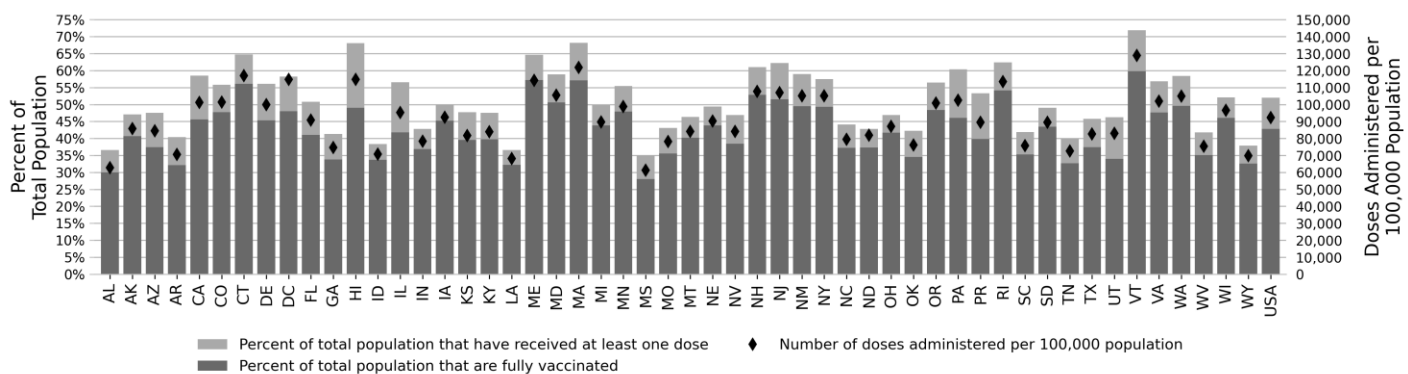

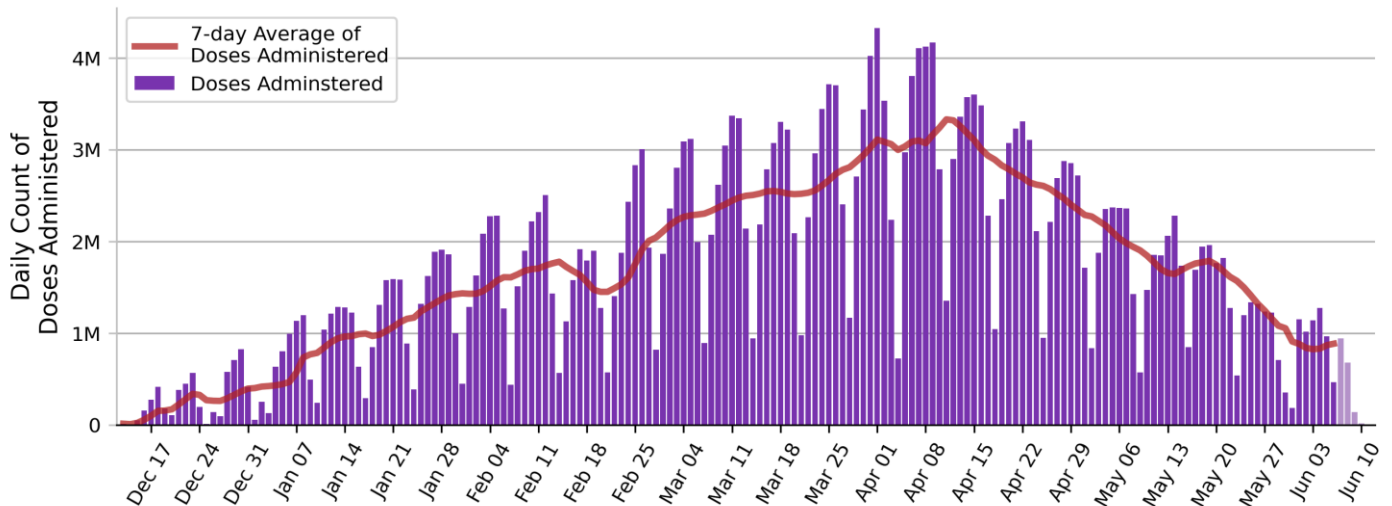

DATA SOURCES
Vaccinations: CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 12:23 EDT on 06/11/2021. Data last updated 06:00 EDT on 06/11/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. Due to delays in reporting, data on doses administered in recent days (as reflected by lighter blue coloring in the Daily National Count figure) may be an underestimate of the actual value.
METHODS: Details available on last two pages of report.

## VIRAL (RT-PCR) LAB TEST POSITIVITY IN THE WEEK:

ONE MONTH BEFORE
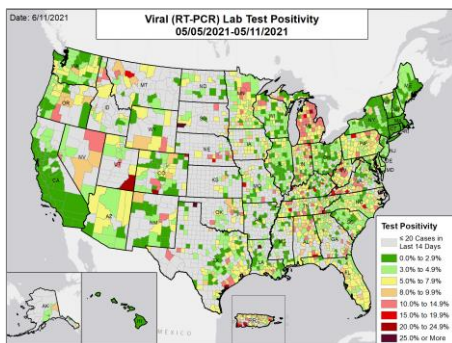

TWO MONTHS BEFORE
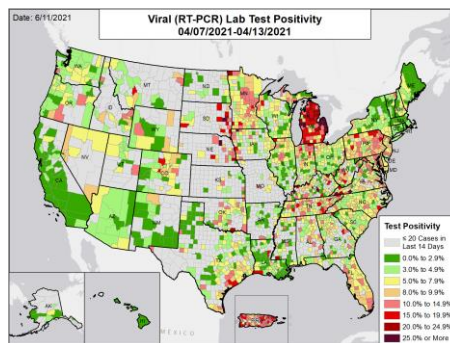

THREE MONTHS BEFORE
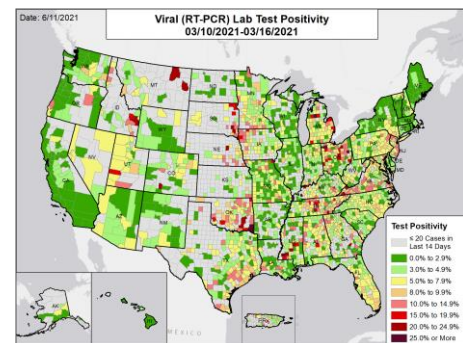

DATA SOURCES
Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.
**Testing:** Combination of CELR (COVID-19 Electronic Lab Reporting) state health department-reported data and HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) through 6/8/2021. The week one month before is from 5/5 to 5/11; the week two months before is from 4/7 to 4/13; the week three months before is from 3/10 to 3/16. As of 5/26, Nebraska is reporting by Local Health Department instead of county; therefore, after 5/25 no county case data is available and county test positivity cannot be accurately displayed. Due to technical issues, Kentucky and Maine's test positivity cannot be calculated for the past week.
METHODS: Details available on last two pages of report.

THREE MONTHS BEFORE

Date: 6/11/2021

New Deaths per 100K
03/12/2021-03/18/2021

**DATA SOURCES**

Note: Some dates may have incomplete data due to delays in reporting. Data may be backfilled over time, resulting in week-to-week changes.

Deaths: County-level data is from a CDC managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Puerto Rico is shown at the territory level as deaths are not reported at the municipio level. As of 3/2/2021, Ohio changed their method of reporting COVID-19 deaths and will report deaths on the day of death, not the day of report, which could result in a fluctuation in the number of deaths from recent weeks due to delayed reporting. As of 5/26, Nebraska is reporting by Local Health Department instead of county; therefore, after 5/25 no county case and death data is available. The week one month before is from 5/7 to 5/13; the week two months before is from 4/9 to 4/15; the week three months before is from 3/12 to 3/18. Florida and Washington corrected previously reported deaths on 6/8, resulting in a decrease in the total deaths over the pandemic. As such, weekly counts are not reflective of true values. As of 6/4, Florida is only updating their county cases and deaths data on Fridays, therefore values for the last week may be an underestimate.

METHODS: Details available on last two pages of report.

National Picture: Community Transmission

COMMUNITY TRANSMISSION BY COUNTY

Combined Transmission Levels Over Time

Transmission Level
- High
- Substantial
- Moderate
- Low
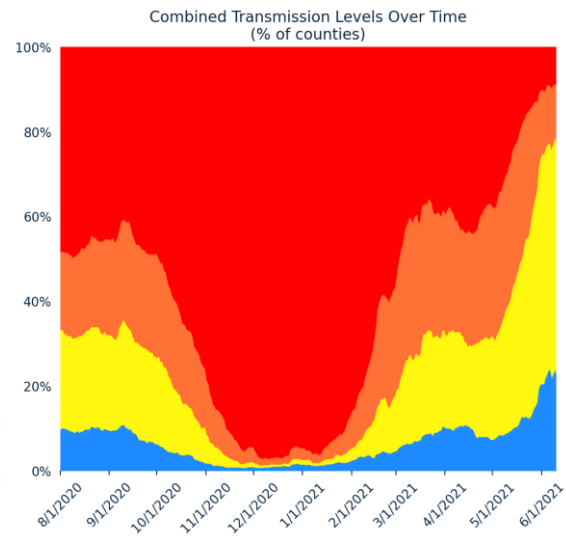

COUNTIES BY COMMUNITY TRANSMISSION INDICATOR

CASES PER 100K	0 TO 9	10 TO 49	50 TO 99	100 +
# OF COUNTIES (CHANGE)	826 (↑94)	1808 (↓47)	430 (↓54)	156 (↑7)
% OF COUNTIES (CHANGE)	25.7% (↑2.9%)	56.1% (↓1.5%)	13.4% (↓1.7%)	4.8% (↑0.2%)
TEST POSITIVITY	0.0% TO 4.9%	5.0% TO 7.9%	8.0% TO 9.9%	10.0% +
# OF COUNTIES (CHANGE)	2647 (↑233)	310 (↓118)	84 (↓47)	179 (↓68)
% OF COUNTIES (CHANGE)	82.2% (↑7.2%)	9.6% (↓3.7%)	2.6% (↓1.5%)	5.6% (↓2.1%)

COUNTIES BY COMBINED TRANSMISSION LEVEL

CATEGORY	LOW TRANSMISSION BLUE	MODERATE TRANSMISSION YELLOW	SUBSTANTIAL TRANSMISSION ORANGE	HIGH TRANSMISSION RED
# OF COUNTIES (CHANGE)	751 (↑114)	1762 (↑16)	417 (↓72)	290 (↓58)
% OF COUNTIES (CHANGE)	23.3% (↑3.5%)	54.7% (↑0.5%)	13.0% (↓2.2%)	9.0% (↓1.8%)

DATA SOURCES & METHODS

STATE PROFILE REPORT | 06.11.2021

- Some dates may have incomplete data due to delays and/or differences in state reporting. Data may be backfilled over time, resulting in week-to-week changes. It is critical that states provide as up-to-date data as possible. Figures and values may also differ from state reports due to differing methodologies.

- All population values are vintage 2019 US Census data.

- **Cases and Deaths:** County-level data is from a CDC-managed aggregate county dataset compiled from state and local health departments; therefore, the values may not match those reported directly by the state. State values are aggregated data provided by the states to the CDC. Data is as of 13:43 EDT on 06/11/2021. Florida and Washington corrected previously reported deaths on 6/8, resulting in a decrease in the total deaths over the pandemic. As such, weekly counts are not reflective of true values. As of 5/26, Nebraska is reporting by Local Health Department instead of county; therefore, after 5/25 no county case and death data is available. As of 6/4, Florida is only updating their county cases and deaths data on Fridays, therefore values for the last week may be an underestimate.
    - Historical reports of cases and deaths — for which backfill dates are not available — that exceed 1% of the total new cases or deaths reported in the US that day have been excluded from state daily and weekly trends. However, these are still present in county-level data. Historical reports in the last two weeks (5/28/21 – 6/10/21) are:
        - Indiana cases: 765 on 6/3
        - Kentucky deaths: 4 on 5/28; 18 on 5/29; and 260 on 6/1
        - Louisiana cases: 464 on 6/9
        - Michigan deaths: 37 on 6/8 and 28 on 6/10
        - Mississippi deaths: 3 on 5/30; 2 on 5/31; 1 on 6/2; 1 on 6/3; 4 on 6/6; 8 on 6/7; and 4 on 6/10
        - Texas cases: 329 on 6/3; 833 on 6/4; 362 on 6/5; 13 on 6/6; 137 on 6/7; 2,509 on 6/8; and 4,750 on 6/9
        - West Virginia deaths: 18 on 6/9

- **Testing:** The data presented represent viral COVID-19 laboratory diagnostic and screening test (reverse transcription polymerase chain reaction, RT-PCR) results—not individual people—and exclude antibody and antigen tests, unless stated otherwise. CELR (COVID-19 Electronic Lab Reporting) state health department-reported data are used to describe county-level viral COVID-19 RT-PCR result totals when information is available on patients' county of residence or healthcare providers' practice location. HHS Protect laboratory data (provided directly to Federal Government from public health labs, hospital labs, and commercial labs) are used otherwise. Because the data are deidentified, total RT-PCR tests are the number of tests performed, not the number of individuals tested. RT-PCR test positivity rate is the number of positive tests divided by the number of tests performed and resulted. For test positivity, last week data are from 6/2 to 6/8; previous week data are from 5/26 to 6/1; the week one month before data are from 5/5 to 5/11. For number of tests, last week data are from 5/29 to 6/4; previous week data are from 5/22 to 5/28. HHS Protect data is recent as of 10:14 EDT on 06/11/2021. Testing data are inclusive of everything received and processed by the CELR system as of 19:00 EDT on 06/10/2021. Due to technical issues, Kentucky and Maine's test positivity cannot be calculated for the past week.

- **Hospitalizations:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. In addition, hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. The data presented represents raw data provided; we are working diligently with state liaisons to improve reporting consistency. Data is recent as of 10:17 EDT on 06/11/2021.

- **Hospital PPE:** Unified Hospitals Dataset in HHS Protect. This figure may differ from state data due to differences in hospital lists and reporting between federal and state systems. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Hospitals explicitly identified by states/regions as those from which we should not expect reports were excluded from the percent reporting figure. Data is recent as of 10:11 EDT on 06/11/2021.

- **Skilled Nursing Facilities:** National Healthcare Safety Network (NHSN). Data report resident and staff cases independently. Quality checks are performed on data submitted to the NHSN. Data that fail these quality checks or appear inconsistent with surveillance protocols may be excluded from analyses. Data presented in this report are more recent than data publicly posted by CMS. Last week is 5/31-6/6, previous week is 5/24-5/30.

- **State, County, and Metro Area Community Transmission Levels**
    - **High Transmission:** Those states, CBSAs, and counties that during the last week reported 100 or more cases per 100,000 population or a lab test positivity at or above 10.0%.
    - **Substantial Transmission:** Those states, CBSAs, and counties that during the last week reported from 50 to 99 cases per 100,000 population or a lab test positivity from 8.0% to 9.9%.
    - **Moderate Transmission:** Those states, CBSAs, and counties that during the last week reported from 10 to 49 cases per 100,000 population or a lab test positivity from 5.0% to 7.9%.
    - **Low Transmission:** Those states, CBSAs, and counties that during the last week reported from 0 to 9 cases per 100,000 population or a lab test positivity from 0.0% to 4.9%.
    - If the two indicators suggest different transmission levels, the higher level is selected. Previous week transmission levels are computed based on current data. See CDC COVID Data Tracker.

- **Shortages:** Unified Hospitals Dataset in HHS Protect. These data exclude psychiatric, rehabilitation, and religious non-medical hospitals. Includes hospitals currently reporting a staffing shortage. Low supply is defined as a hospital reporting they are not able to maintain a 3-day supply of N95s, face masks, gloves, gowns, or eye protection. Data is recent as of 10:11 EDT on 06/11/2021.

- **Vaccinations:** CDC COVID Data Tracker. Data includes the Moderna, Pfizer BioNTech, and J&J/Janssen COVID-19 vaccines and reflects current data available as of 12:23 EDT on 06/11/2021. Data last updated 06:00 EDT on 06/11/2021. Persons who are fully vaccinated include those who have received both doses of the Moderna or Pfizer-BioNTech vaccine as well as those who have received one dose of the J&J/Janssen vaccine. Allocations are made pro rata (equal based on population) from which jurisdictions are then to order. COVID-19 vaccines available in the U.S. are authorized only for persons ≥12 years of age (Pfizer-BioNTech) or ≥18 years of age (Moderna and J&J/Janssen). The following states have ≤80% completeness reporting vaccinations by county, which may result in underestimates of vaccination data for counties: VT (74%), CO (74%), WV (55%), GA (51%), VA (51%), HI (0%), and TX (0%).

- **Variants:** Data from CDC COVID Data Tracker. Variant proportions are based on representative CDC sequence data (NS3 + CDC-funded contract sequencing) collected over a 4-week period ending May 22, 2021 for states with at least 300 sequences. Proportions are calculated using empirical (unweighted) data, which are subject to change over time and will be updated as more data become available. Proportions of variants do not represent the total number that may be circulating in the United States and may not match cases reported by states, territories, tribes, and local officials. For states and jurisdictions not listed, CDC has insufficient genomic surveillance data for the specified time period. Data updated by 19:00 ET on 6/8. Data pulled 15:39 EDT on 06/10/2021.

DATA SOURCES & METHODS
STATE PROFILE REPORT | 06.11.2021

Color threshold values are rounded before color classification

Metric	Dark Green	Light Green	Yellow	Orange	Light Red	Red	Dark Red	Darkest Red
New cases per 100,000 population per week	≤4	5 – 9	10 – 49	50 – 99	100 – 199	200 – 499	500 – 749	≥750
Percent change in new cases per 100,000 population	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 99%	100% – 999%		≥1000%
Diagnostic test result positivity rate	≤2.9%	3.0% – 4.9%	5.0% – 7.9%	8.0% – 9.9%	10.0% – 14.9%	15.0% – 19.9%	20.0% – 24.9%	≥25.0%
Change in test positivity	≤-2.1%	-2.0% – -0.6%	-0.5% – 0.0%	0.1% – 0.5%	0.6% – 2.0%		≥2.1%	
Total diagnostic tests resulted per 100,000 population per week	≥5000	3000 – 4999	2000 – 2999	1000 – 1999	500 – 999		≤499	
Percent change in tests per 100,000 population	≥26%	11% – 25%	1% – 10%	-10% – 0%	-25% – -11%		≤-26%	
COVID-19 deaths per 100,000 population per week	0.0		0.1 – 0.9	1.0 – 1.9	2.0 – 4.9	5.0 – 9.9	10.0 – 14.9	≥15.0
Percent change in deaths per 100,000 population	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 25%		≥26%	
Skilled Nursing Facilities with at least one resident COVID-19 case, death	0%		1% – 5%		≥6%			
Change in SNFs with at least one resident COVID-19 case, death	≤-2%		-1% – 1%		≥2%			
Confirmed and suspected new COVID-19 hospital admissions per 100 beds	≤2	3 – 5	6 – 10	11 – 15	16 – 20	21 – 25	≥26	
Confirmed new COVID-19 hospital admissions per 100 beds	≤1	2 – 3	4 – 5	6 – 10	11 – 15	16 – 20	≥21	
Change in new COVID-19 hospital admissions per 100 beds	≤-26%	-25% – -11%	-10% – 0%	1% – 10%	11% – 25%		≥26%	
Percent of hospitals with supply/staff shortages	≤9%		10% – 19%	20% – 29%	30% – 39%		≥40%	
Change in percent of hospitals with supply/staff shortages	≤-10%	-9% – -5%	-4% – 0%	1% – 4%	5% – 9%		≥10%	

Percent of Population Fully Vaccinated (State Level)	0.0 – 34.9%	35.0 – 39.9%	40.0 – 44.9%	45.0 – 49.9%	≥50.0%
